

MARKOSKY

FEDERAL CAPABILITIES

CORE COMPETENCIES & SERVICES

THE MARKOSKY ENGINEERING GROUP, INC. provides environmental consulting, civil engineering design, and construction management and inspection services to our federal clients, both as a prime consultant and as a subconsultant.

We are an SBA certified Woman-Owned Small Business headquartered in western PA with branch offices in OH and WV. We are currently working on federal projects in PA, OH, WV, and KY. Our geographic reach for Federal pursuits is not limited by our office locations – we will consider any project that we can successfully deliver.

CORE SERVICES

- Environmental Consulting, Planning, Permitting & Design
- Hydrologic & Hydraulic Studies
- Archaeological Investigations / Historic Structures Evaluations
- Bridge & Structure Design
- NBIS Bridge & Tunnel Inspection
- Major Highway & Roadway Design
- Traffic Engineering
- Construction Management & Inspection

DIFFERENTIATORS

- Produce clear and concise documentation that streamlines agency reviews and expedites environmental approvals.
- Write special provisions and reports that have been used by agencies as examples for other consultants to follow.
- Create innovative designs to reduce project impacts and significantly advance delivery schedules.
- Three FHWA-delegated Cultural Resource Professionals on staff responsible for Section 106 compliance.
